How you sign in to Google

Make sure that you can always access your Google Account by keeping this information up to date

2-Step Verification	2-Step Verification is off	>
Passkeys	Start using passkeys	>
Password	Last changed 23:55	>
Recovery phone	082180 27307	>

← 2-Step Verification

Protect your account with 2-Step Verification

Prevent hackers from accessing your account with an additional layer of security. When you sign in, 2-Step Verification helps make sure that your personal information stays private, safe and secure.

Security made easy

In addition to your password, 2-Step Verification adds a quick, second step to verify that it's you.

Use 2-Step Verification for all your online accounts

2-Step Verification is a proven way to prevent widespread cyber-attacks. Turn it on wherever it's offered to protect all your online accounts.

Safer with Google

[Get started](#)

← 2-Step Verification

Use your phone as your second step to sign in

After you enter your password, Google prompts are securely sent to every phone where you're signed in. Just tap the notification to review and sign in.

These devices can get prompts

Don't see your device?

CONTINUE

← 2-Step Verification

Almost there! Add a backup option

If you lose your phone or your second step is unavailable, you'll need a backup option to help you get in to your account.

Google will only use this number for account security.
Don't use a Google Voice number.
Message and data rates may apply.

How do you want to get codes?

☒ Text message ☐ Phone call

☐ 2-Step Verification

phone, like when you're travelling.

**Authenticator app**

Use the authenticator app to get verification codes at no charge, even when your phone is offline. Available for Android and iPhone.

**Security Key**

A security key is a verification method that allows you to securely sign in. These can be built in to your phone, use Bluetooth or plug directly into your computer's USB port.

**Devices that don't need a second step**

You can skip the second step on devices that you trust, such as your own computer.

**Devices you trust**

Revoke trusted status from your devices that skip 2-Step Verification.

[REVOKE ALL](#)**App passwords**

App passwords aren't recommended and are unnecessary in most cases. To help keep your account secure, use 'Sign in with Google' to connect apps to your Google Account.

App passwords

1 password

← App passwords

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

Generated app password

Your app password for your device

XXXXXXXXXXXXXXXXXXXX

How to use it

Go to the settings for your Google Account in the application or device you are trying to set up. Replace your password with the 16-character password shown above. Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with anyone.
